- Poses none of the risks or harmful side effects of oral anti-fungal medications.
- Fast and easy toenail fungus removal- Convenient in-office procedure that typically takes 20 minutes.
- Painless toenail fungus removal!

Toenail fungus is a condition marked by the growth of fungus under the nail. Fungi feed on keratin, the protein that makes up the hard surface of the toenails. The infected nail often turns darker in color, and debris may accumulate under the nail. PinPointe uses laser light to kill the fungus that lives in and under the nail without causing damage.
